Research Interests

Computer systems, software engineering, program analysis, and HCI.

The goal of my research is to enable the design and implementation of *reliable* and *secure* computer systems, especially those operate at cloud and datacenter scale. My Ph.D. work focuses on tackling one dominant cause of real-world cloud and datacenter failures—*configuration errors*. My recent work also includes addressing security misconfigurations and defending mobile systems against disruptive apps. My work intersects systems, software engineering, program analysis, and HCI.

Education

2011–present **University of California San Diego**, La Jolla, CA.

Ph.D. in Computer Science

Advisor: Professor Yuanyuan Zhou

2003–2010 **Nanjing University**, Nanjing, China.

M.Eng. and B.S. in Computer Science

Awards and Honors

2016 Jay Lepreau Best Paper Award of OSDI'16

2011 UCSD Fellowship for Graduate Study

2010 Erasmus Mundus LiSUM Scholarship

2009 Best Paper Award of International Conference on Communications

2009 IBM Chinese Excellent Student Scholarship

2008 HP Chinese Excellent Student Scholarship

Impact

- ◇ My research has led to more than a hundred code improvements towards better configuration design and implementation—benefiting thousands of configuration parameters—in both commercial and open-source systems including NetApp storage products, Apache web server, Hadoop, HBase, Squid, MySQL, PostgreSQL, VSFTP, ZooKeeper, Alluxio, Accumulo, and Redis.
- ◇ The configuration usage study [FSE'15] was widely quoted within NetApp and has been used to make decisions on improving configuration design for reducing customers' misconfigurations. The Spex work [SOSP'13] resulted in finding 77 confirmed misconfiguration vulnerabilities, which were then fixed, in NetApp's OS.
- ◇ Spex [SOSP'13] has motivated the Squid web proxy project to improve its configuration parsing library.

Work Experience

- 2015 Summer **Research Intern**, *NetApp Inc.*

researched how to reduce MTTR (Mean Time To Resolution) by automatically triaging and troubleshooting customers' issues of networked storage systems

2012 Summer **Research Intern**, *NetApp Inc.*

applied Spex [SOSP'15] to NetApp's storage products and uncovered 77 misconfiguration vulnerabilities

2010–2011 **Technical Staff**, *University of Goettingen*, Germany.

Teaching and Mentoring

Teaching Assistant

2017 Spring UCSD CSE 221: Advanced Operating Systems (with Prof. Yuanyuan Zhou)

2016 Fall UCSD CSE 120: Principles of Computer Operating Systems (with Prof. Yuanyuan Zhou and Prof. Geoffrey M. Voelker)

2016 Spring UCSD CSE 221: Advanced Operating Systems (with Prof. Yuanyuan Zhou)

2015 Spring UCSD CSE 599: Teaching Methods in Computer Science (with Prof. Leo Porter)

2014 Fall UCSD CSE 221: Advanced Operating Systems (with Prof. Stefan Savage)

2014 Summer UCSD CSE 101: Design and Analysis of Algorithms (with Prof. Mohan Paturi)

2014 Spring UCSD CSE 120: Principles of Computer Operating Systems (with Prof. Yuanyuan Zhou)

2013 Fall UCSD CSE 221: Advanced Operating Systems (with Prof. Yuanyuan Zhou)

2012 Fall UCSD CSE 101: Design and Analysis of Algorithms (with Prof. Sanjoy Dasgupta)

2010 Winter University of Goettingen M.Inf.223: Advanced Topics in Computer Networking

2007 Fall Nanjing University: Operating System Principles

Research Mentoring

2015–present for UCSD undergraduate student Raphael Lu

I mentored Raphael when he worked with us on studying real-world security misconfigurations [CHI'17]. Raphael is applying for Ph.D. programs.

2015–2016 for UCSD undergraduate student Han Min Naing

I mentored Han when he worked with us on studying real-world security misconfigurations [CHI'17]. Han joined Webroot Inc., and has helped the company build the configuration management system that deploys and monitors hundreds of cloud instances.

2014-2015 for UCSD Ph.D. student Long Jin

I mentored Long when he worked with us on studying configuration usage characteristics [ESEC/FSE'15] and PCheck [OSDI'16].

2014–2015 for UCSD Master's student Tao Cai

I co-advised Tao with Prof. Yuanyuan Zhou when he worked with us on PCheck [OSDI'16]. Tao joined LinkedIn and is working on LinkedIn's configuration systems.
